Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mueller et al (5,801,829).

With respect to claim 1, Mueller discloses an apparatus for selecting a band of wavelengths (column 5, lines 15-25). The apparatus comprises: a first light-transmissive filter 118 (fig 1) for admitting light to a sensor 116 (fig 1), a second filter 120 (fig 1).

Mueller does not explicitly disclose transmitting light of orange and longer wavelengths as claimed. However, it would have been obvious to modify Mueller's filters to select any specific band of wavelengths or any single wavelength for different uses.

Mueller does not disclose using an infrared filter. Using an infrared filter would have been known. It would have been obvious to substitute Mueller with the known infrared filter to use the system in different environments.

With respect to claims 2-4, it would have been obvious to modify Mueller's filters with different transmissive wavelength range for selecting different band of wavelengths.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mueller et al (5,801,829) in view of Solomon (5,036,203).

With respect to claim 5, Muller does not disclose using a second filter for a second set of photodetectors. Solomon discloses a sensor arrays 14 (fig 3) having different filters 44,46 (fig 3). It would have been obvious to modify Muller with Solomon to select different colors at the same time.
